AHMED NAZEEH ABDULMUAIN QASEM

Information Technology and Software Development

Al Kawthar, Taiz, Yemen

+967 776 049 183 | ahmednazn2020@gmail.com | github.com/Hanbuyon

Portfolio | Manazil | Dr. Noha Clinic | SyncCode

Professional Summary

Information Technology graduate combining web development and AI integration with practical experience in records and administration. Contributed to a team project that placed third in the Tamkeen competition in Taiz governorate, developed personal and community tools, and worked with school records, clinic administration and account review. Also brings basic university project experience with Microsoft SQL Server, SQL queries and stored procedures, and deploying a simple web application to IIS on a Windows Server virtual machine.

Education

Bachelor of Information Technology

University of Science and Technology, Taiz, Yemen | 2022 - 2026

Degree requirements completed; final result: 96%. Official degree certificate pending.

General Secondary Certificate, Science | Al Nibras School | 2019 - 2020 | 95%

Experience

Clinic Accounts Review

Dr. Noha Dental Clinic | Aug 2026 - Present

• Review clinic accounts and dentists' revenue shares, checking the related financial records.

Student Affairs and Records Administration

Al Kawthar Quran School | Volunteer | Aug - Dec 2022

• Built a Microsoft Access system to track absences, organize student allocation and produce daily and monthly attendance reports.

• Maintained student records and schedules and coordinated administrative tasks using Microsoft Office.

Administrative Secretary and Data Assistant

Dr. Noha Dental Clinic | 2021

• Managed appointments and patient records, entered daily income and expenses, and reviewed accounts with clinic management.

Volunteering

Iftar Sa'im Campaign Management and Web Platform

Community volunteer initiative | Taiz | Ramadan 2024

• Independently built a web platform used during the campaign to publish daily distribution records, photos, donations and expenses.

• Managed the campaign and participated in distribution; achieved the target of 9,000 meals across three sites, with donations exceeding SAR 6,300.

Technical Projects

Manazil

Graduation project | Web platform in development

- A property platform covering short stays and long-term rentals, including property search, bookings, rental requests and related data workflows.
- Project stack: Next.js, React, TypeScript, Supabase and PostgreSQL, with Gemini, RAG and Stripe integrations and Arabic/English interfaces.
- The data layer includes SQL functions and geographic and vector search using PostGIS and pgvector.

SyncCode — Collaborative Document Editor

Completed project | Next.js, Yjs, Socket.io and Supabase

- Built a collaborative editor using Yjs and ProseMirror to synchronize document changes, with Socket.io exchanging updates between users.
- Includes authentication, permissions and document persistence with Supabase, plus local storage using IndexedDB.

https://sync-code-gules.vercel.app/

KHADMAT Support Ticketing Platform

Team competition project | Nov 2025 - Jan 2026

- Coordinated development and worked on AI agent logic, function calling and RAG to retrieve organizational information and perform actions such as ticket creation.
- Developed voice assistant functionality using WebSockets and AudioWorklets within a React, TypeScript, Python, Flask and MySQL project.
- The team placed third in the Tamkeen competition at Taiz governorate level.

https://github.com/Hanbuyon/KHADMAT

Manhwa Tool Kit

Personal project | Used by the developer and a small group of friends

- Built a Gemini OCR and translation tool using React, TypeScript and Supabase; retrieves glossary terms and prior chapter context to maintain consistent names.
- Implemented API request, quota and retry handling. An internal test documented 109 of 111 matching text blocks across 11 images after text and punctuation normalization.

Additional Projects

Dr. Noha Dental Clinic Website

Web development project | Next.js and Vercel

Built a mobile-friendly clinic website presenting services, dentists and location, with appointment enquiries through WhatsApp.

Android Dental Clinic Management App

Prototype in development

Created an AI-assisted prototype and tested it manually on a phone. The project targets patient records, accounts and dentists' revenue shares; the design includes SQLite and Google Sheets synchronization.

Switchyard

Desktop tool in development | Rust and React

Developing a tool to link Gemini conversations with OpenCode sessions and route tasks to the appropriate coding session.

Applied Skills

Data and office tools

Microsoft Access and Office; records, attendance reports, data checks and account review.

Web development and databases

React, TypeScript, Next.js and Supabase applied in the listed projects; experience with MySQL and PostgreSQL.

AI integration

Gemini, agent logic, function calling, RAG, voice assistants and OCR.

Development practices: review AI-assisted code against requirements, use available build checks and tests, and perform manual checks.

Systems and Technical Support

Microsoft SQL Server: Basic hands-on experience in university projects, using databases and writing SQL queries and stored procedures.

Windows Server and IIS: Deployed a simple web application to IIS on a Windows Server virtual machine (VM) and configured its basic runtime requirements in an academic environment.

Networking: Basic knowledge of IP addressing, TCP/IP, DNS and DHCP, with connectivity checks and initial troubleshooting.

Database operations: Basic knowledge of backup and restore processes and database maintenance concepts.

Reporting: Prepare and modify records and attendance reports using Microsoft Access and Office, and check the underlying data.

Support and documentation: Trace errors, test fixes and document setup and troubleshooting steps within projects. Coordinate with development teammates and communicate with users in school and clinic work.

Courses and Training

CCTV Installation and Management

University of Science and Technology, Taiz, Engineering and Computing Department | 16 Sep 2025 | 20 hours

Advanced ICDL

University of Science and Technology | 2023 | 120 hours | 99%

Career and Academic Guidance Using the GIZ Methodology

Mostaqbalna Foundation for Human Development | 5 - 14 Oct 2020 | 10 days

Photography and Video Editing

Al Jund Center for Training and Skills Development | 16 - 31 Jul 2019 | 60 hours | 95%

Talented Students Program

Al Tawasol Foundation for Human Development, Taiz, Sponsorship Department | Q1 2018

Self-development and technology activities, including building, programming and testing a simple robot.

Languages

Arabic: Native. English: Intermediate; GLOPAL Institute, Taiz, Intermediate diploma, 90%.
German: Courses completed through A2 at Pioneers Institute; A1: 93%, A2: 83%.
